The conveniences afforded by the new and extensive edifice in which the lectures are now delivered, are such as will facilitate very much the imparting of medical instruction. The lecture rooms are admirably arranged, well lighted, and warmed. The museum is increasing daily in importance and interest. The rooms of practical anatomy afford advantages rarely equalled; they will be opened the first week of October. The infirmary is under the immediate direction of the faculty of medicine, and this, with the public dispensary, will continue to present numerous and valuable cases for clinical instruction. Clinical lectures will be delivered at least twice a week, and operations performed before the class.

EXTENSION OF PATENTS.

[CIRCULAR.]

PATENT OFFICE, June 21, 1845. signed, constituted by law a board to on applications for the extension of

hereafter apply for extensions.

The questions which arise on each applications an extension are—

1. Is the invention novel?
2. In it useful?
3. Is it valuable and important to the public?
4. Has the inventor been adequately remuneration it is time and expense in originating and perfecting it?

4. Has he used due diligence in introducing his invention into general use?

5. Has he used due diligence in introducing his invention into general use?

The two first questions will be determined upon the result of an examination in the Patent Office; as will also the third, to some extent.

To enable the board to come to a correct conclusion in regard to the third point of inquiry, the applicant should, if possible, procure the testimony of persons disinterested in the invention, which testimony should be taken under oath.

In regard to the fourth and fifth points of inquiry, in addition to his own oath showing his receipts and expenditures on account of the invention, by which its value is to be ascertained, the applicant should show, by the testimony of disinterested witnesses on oath, that he has taken all reasonable measures to introduce his invention into general use, and that, without default or neglect on his part, he has failed to obtain from the use and sale of the invention a reasonable remuneration for the time, ingenuity, and expense bestowed on the same, and the introduction thereof into use.

The report of the examiner upon the novelty and utility of the invention, will be ready fifteen days before the day appointed for the hearing, which will be open for inspection at the Patent Office; opies of which will be furnished to all parties interested, if desired, on payment of the usual fees for copies.

In case of opposition by any person to the extension of a patent, both parties may take testimony, each giving reasonable notice to the other of the time and place of taking said testimony, which shall be taken according to the rules prescribed by the Commissioner of Patents in cases of interference.

All arguments submitted to the board must be in writing.

In conclusion, the undersigned would remark,

MRS. DAVID H. BURR'S

French and English seminary for Young Ladies, corner of E and 3th streets, Washington city.

The location of this seminary is one of the most distrable in the city, on account of its healthy addings, with ample grounds and other facilities for amusement and recreation. The principal, so well and favorably known in this city, and in New York, from her long experience in teaching, hopes their daughters to her care. She is a native of France, and familiar with its language and literature, and conversant with the best and casiest modes of imparting to her pupils a perfect knowledge of the third and conversant with the best and casiest modes of imparting to her pupils a perfect knowledge of the standard of the family have the peculiar advantages of hearing, and conversing at all times in the French language, and of perfecting themselves in the science of music, being under the surveillance of an experienced teacher. The course of instruction, besides the anual elementary branches, includes all the higher studies pursued in the most approved northern seminaries. The discipline is mild and affectionate, yet decided, and is mantanined by appeals to the affections and conscience of the pupil; it is designed, by a proper development and cultivation of the better qualities of the heart, to bind more affectionately the pupil to her teacher, and by it to secure obedience. As sound physical, moral, and intellectual improvement and culture, are the great objects desired, it is the aim of the principal not so much to crowd the memory with words, as to draw forth and train the systematic and vigorous action, the observing, reflecting, and active powers of the mind. The charges to those who reside in the family are, for board and tuition in all the branches of French and English, \$200 per annum for a single pupil; but when two or more are entered at the same time, a liberal deduction will be made. The additional charges per quarter are for music, piano, and guitar, \$15; use of instrument, \$25 (vocal music, All arguments submitted to the board must be in writing.

In conclusion, the undersigned would remark, generally, that a monopoly of his invention is secured by law to the inventor for the term of four-teen years. This is done with a view to compensate him for his time and expense in originating and perfecting it. At the end of the time for which his patent runs, his monopoly should cease, and the invention become public property, unless he can show good reasons to the contrary. The presumption is always against his application; and if he cannot show that his invention is novel, useful, valuable, and important to the public, and that, having made all reasonable effort to introduce it into general use, he has not been adequately remunerated for his time and expenses in discovering and perfecting it, the board cannot grant an extension.

DR. DYOTT'S ANTI-BILIOUS PILLS.

Aug 4—2aw2m

PREPARATORY DEPARTMENT OF THE COLUMBIAN COLLEGE, D. C.—In this school, pupils are fitted for admittance to the college classes, or for other objects. Students who are unprepared for entering a particular class, may here pursue the requisite studies; while those who are not designed for a profession can select such branches as will suit their objects in life.

Mr. Thomas W. Tobey—a gentleman who is amply qualified, having passed through a collegiate course, and been engaged for several years in the business of instruction—will have charge of the school. His whole time and energies will be devoted to its interests; and it is hoped it will thus be rendered worthy of extensive patronage.

This school will be under the constant superintendence of the faculty of the college. DR. DYOTT'S ANTI-BILIOUS PILLS.

A S a family medicine, a mild and gentle purgative, and purifier of the blood. The general use of these celebrated pills throughout the United States for these forty years past, and the strong recommendations they have acquired from all classes of our fellow-citizens, places them in a much more elevated situation in public estimation, than any other remedy which has heretofore been introduced.

The following are among the many diseases for which Dr. Dyott's celebrated pills are so deservedly distinguished for curing. By their counteracting properties in removing the bile from the stomach, they prevent and cure the bilious fever; chills, or ague and fever; spring and fall fevers; yellow fever; bilious cholic; pleurisy; dysentery; worms; bilious vomiting; sick and foul stomach.

bilious cholic; pleurisy; dysentery; worms; bilious vomiting; sick and foul stomach.

By cleansing the bowels and stomach from all impurities, they restore the loss of appetite, remove flatulency, cure the headache, habitual costiveness, colds, coughs, asthma, epileptic fits, hypochondris, hysterical complaints, stranguary, gravel, &c.

By a general and copious use, they will be found very beneficial in curing the rheumatism and gout, lumbago or pains in the back.

All impurities in the blood yield to their happy effects, whether proceeding from constitutional ailment, or from indiscreet intemperance.

These celebrated pills have been used to very great advantage in curing the dyspepsia, or indigestion, bronchitus, liver complaint, &c.

They are an infallible medicine for female complaints generally, and capecially for removing those obstructions which are the source of their ailments at certain periods; they possess the eminent advantage in curing the dyspepsia of the second control of the second

limited number of young ladies in the several branches of a thorough English and French education.

The English department will be conducted by a lady who was formerly a teacher in the Albany Female Academy, and has been for several years teaching in the family of Mrs. Elisson.

Great pains will be taken to teach well the principles of science, the application of which will require diligent study on the part of the pupil; and in order to accomplish fully this important object, teachers of the highest qualifications will be provided for each department. The French teacher will reside in the family, and the pupils will be taught to speak accurately, as well as to read and write the French language.

To those young ladies whose parents desire it, a course of instruction will be given in Latin, as the foundation of modern languages.

The government will be parental, and conducted on Christian principles. Alexandria is admirably located for an institution of this kind, being retired and healthy, combining the advantages of town and country. Members of Congress who have daughters to educate, will find this institution convenient for that purpose, as steamboats ply hourly between Alexandria and Washington city.

The scholastic year will be divided into two sessions, of twenty-two weeks each, commencing on the 8th of September, and the 8th of February.
